# UAZ Profi light truck

A high-performance light truck, as comfortable as a passenger car, combines all the main advantages necessary for your business to thrive. Uncompromisingly.

Cost-efficient and fuel-saving, fail-safe and hard-wearing. The field-proven ZMZ Pro engine goes seamlessly with a 5-speed manual gearbox.

With its body-on-frame design, the UAZ Profi can easily carry 1.5 tons in the city and on rough terrain alike. Without trading off comfort and silence. The only Russian-made light truck equipped with an airbag as a basic trim option.

Consistent performance day after day, however demanding the tasks are. Plenty of choices in everything, whether it be a drive layout, a fuel or cargo bed design. Roomy, yet comfortable and safe.

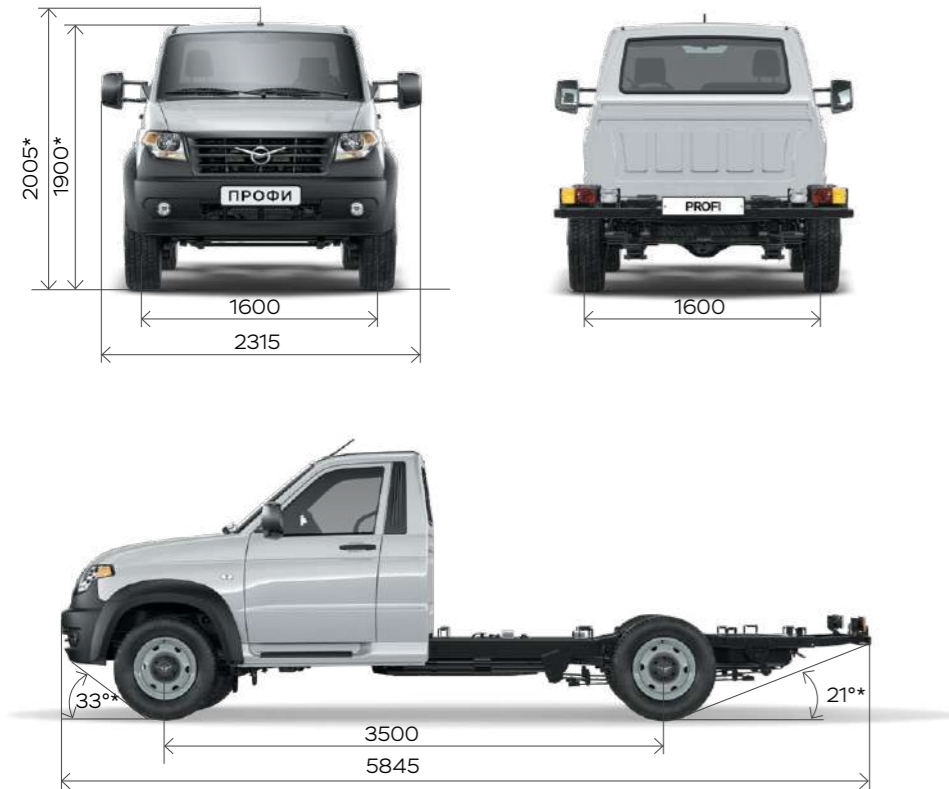

## Real alternative

Multiple choices is a must. Indeed, the UAZ Profi offers plenty of real alternatives, whatever it is. How many Euro pallets to load: four, five or eight? The vehicle is available with standard or wide bodies, and extended wheelbase.

Single cab is enough or crew cab would be better? Both are available, make your choice. Petrol or natural gas, which one? Either fits. Battling through traffic jams or explore faraway locations off the beaten track? Now that you enjoy choice between RWD and AWD, you may drive up hill and down dale.

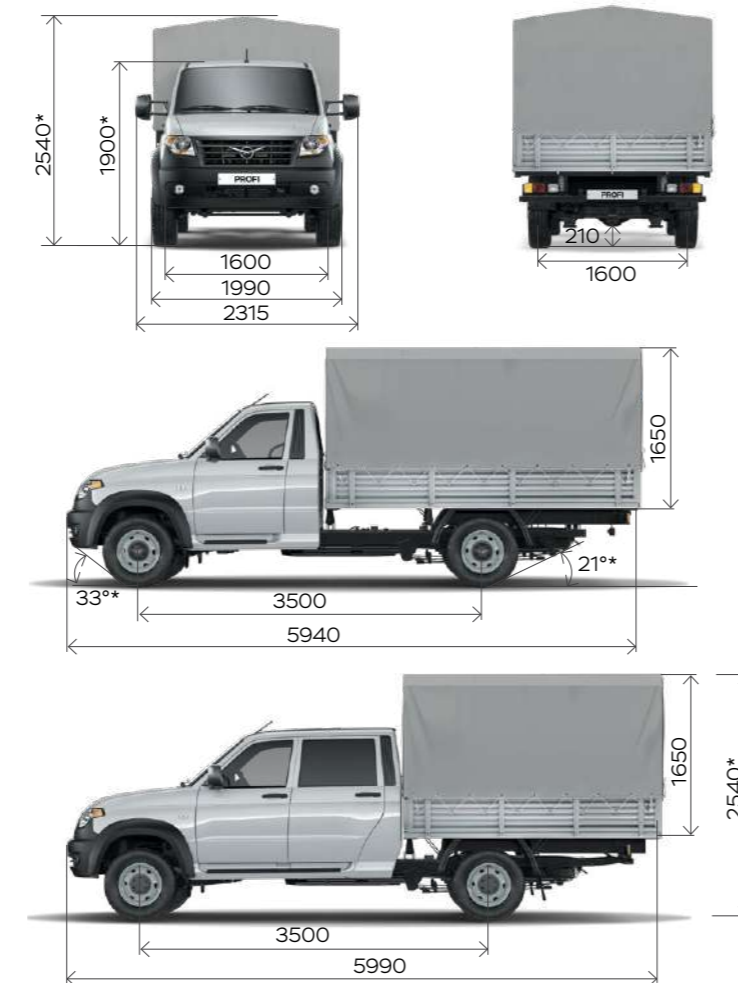

# Versions

# Exterior

Functional style and eye-pleasing look harmonize in brawny image. Elaborated to the last detail, it adds to your success. Unpainted front bumper and fender flares boost your confidence when having to perform evasive maneuvers. Impressive wing mirrors provide a perfect side view. Once you turn the ignition key, the daytime running lights are on. Anti-slip footrests will surely to keep you on your feet.

Radiator grille

Anti-slip footrests

Unpainted front bumper and fender flares

Heated mirrors (for wide bed versions and extra equipment options)

Heated and electrically adjustable mirrors (standard bed versions)

Halogen headlights and daytime running lights

# Capacity

Speaking of Euro pallets... ..or, more precisely, the payload the UAZ Profi can carry. A standard curtain box holds 9.5 cu. m. on four Euro pallets, a wide one holds 10.5 cu. m. on five Euro pallets, and a long one holds 16 cu. m. on eight Euro pallets. Smooth steel boards on the inside, durable plywood flooring and the clear-cut curtain box – together they form a space devoid of protruding parts. Not an inch less! The curtain box as high as 1850 mm allows standing to your full height.

The cargo box on long wheelbase holds 16 cu. m. of freight on eight Euro pallets. And the last but not least, crew cab allows extra 7.2 cu. m. for transportation. Even in the rush hour loading/unloading will be simple thanks to effortlessly opening sides, and you can easily raise the curtain flap by yourself, with no tools used.

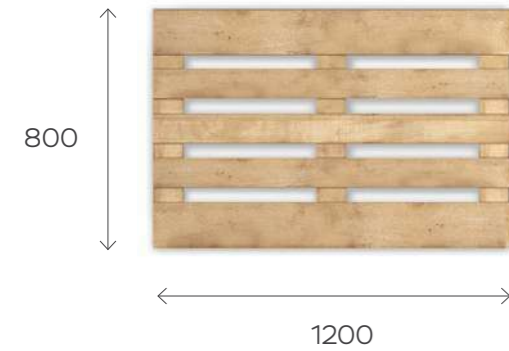

Each side of the cargo box opens independently

Translucent panels in the curtain box roof allow for daylight, no extra light needed

## Versatility

What professionals do appreciate is versatility, which is a prerequisite for rewarding multi-purpose performance. That's when UAZ Profi comes handy. Our truck keeps evolving to keep pace with exceedingly growing and everchanging demands and destinations. Whether on city streets, on international highways or even on rough terrain – it rises to challenges.

Even RWD versions of the UAZ Profi are strikingly powerful on the rough terrain thanks to a ground clearance of 193 mm and state-of-the-art geometry for superior cross-country capabilities. While boasting perfect road-holding on smooth surfaces too. Dual wheels on the rear axle, steering damper and extended front track remarkably enhance stability and overall performance.

# Opportunities with no end in sight

## City

The RWD version of UAZ Profi is designed for easy transportation in the urban environment. Open-type steering knuckles ensure car-like maneuverability even in cramped and confined spaces. With the lofty driving position offering the outlook of the traffic on busy streets, the trucker is the master of situation.

## Highway

Beyond the city limits, the powerful and torquey ZMZ Pro engine will show its best. Its unceasing stamina will give you peace of mind. Long trips across Russia are fraught with risks due to the vagaries of the weather. A seemingly safe road, dry and inviting, turns into a slippery trap in no time. The UAZ Profi has everything to keep you safe in challenging conditions. Even the basic trim comes with ABS.

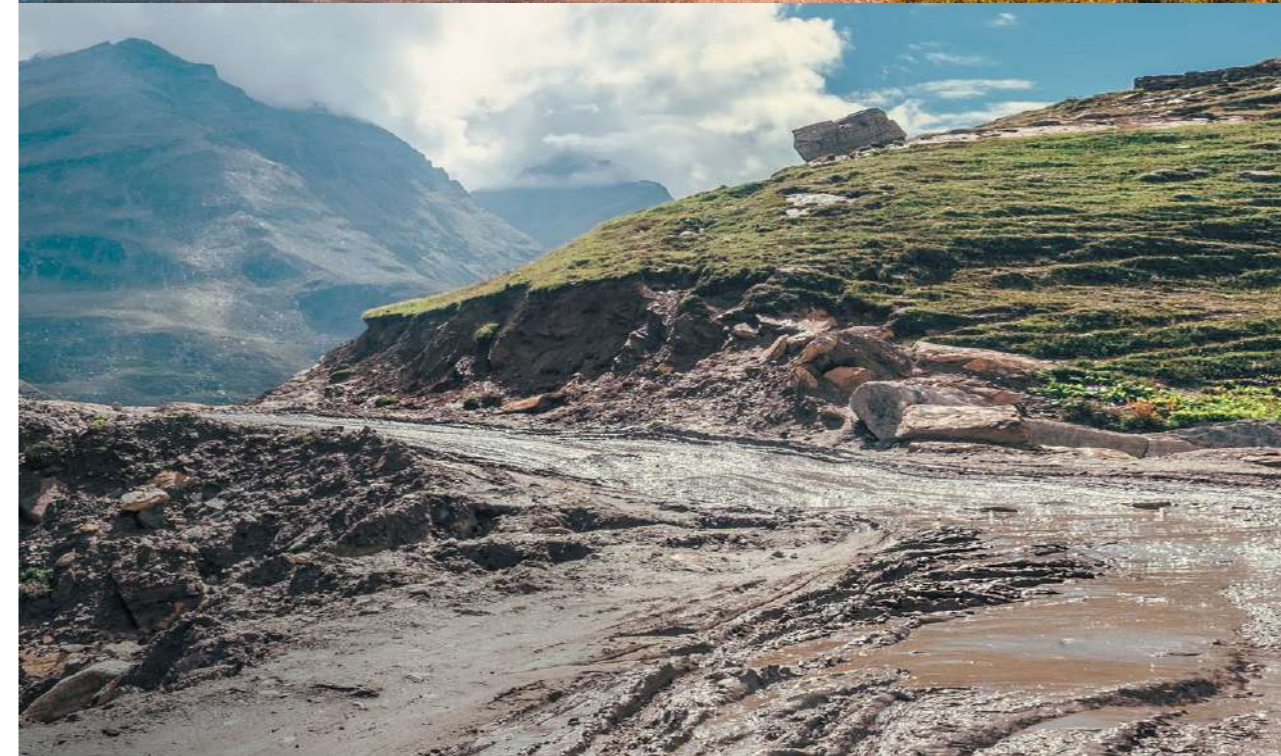

## Dirt road

As long as you are driving along a highway, there is no point in employing all-wheel drive. However, trucks that never entered dirty roads are few and far between. Such trips will not be an ordeal any longer, as the rigid rear axle locking differential will help you out, even on RWD versions of the UAZ Profi. High ground clearance further ensures that you reach the destination as scheduled.

## Cross-country

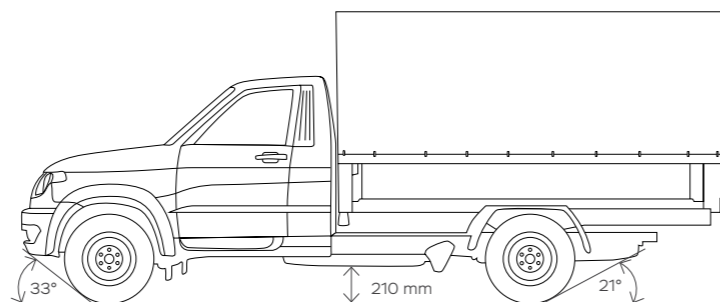

See the road? No? There is one, though! Now that the UAZ Profi is perfectly equipped for cross-country and rough terrain conditions – all-wheel drive, a low-range gearing and a controlled rear axle locking differential – the road has no end in sight.

# All-Terrain & Off-Road

Ain't no road too rough any longer. Never mind the road surface - compliments to broad ground clearance and optional rear axle locking differential, manually activated with a button in the cab and automatically deactivated at a speed of 30 km/h. Don't let one wheel stop while the other is skidding.

Should these tricks be inadequate on the worst impassable spots, all-wheel drive with low-range gearing will be your saving remedy.

# Robust petrol engine

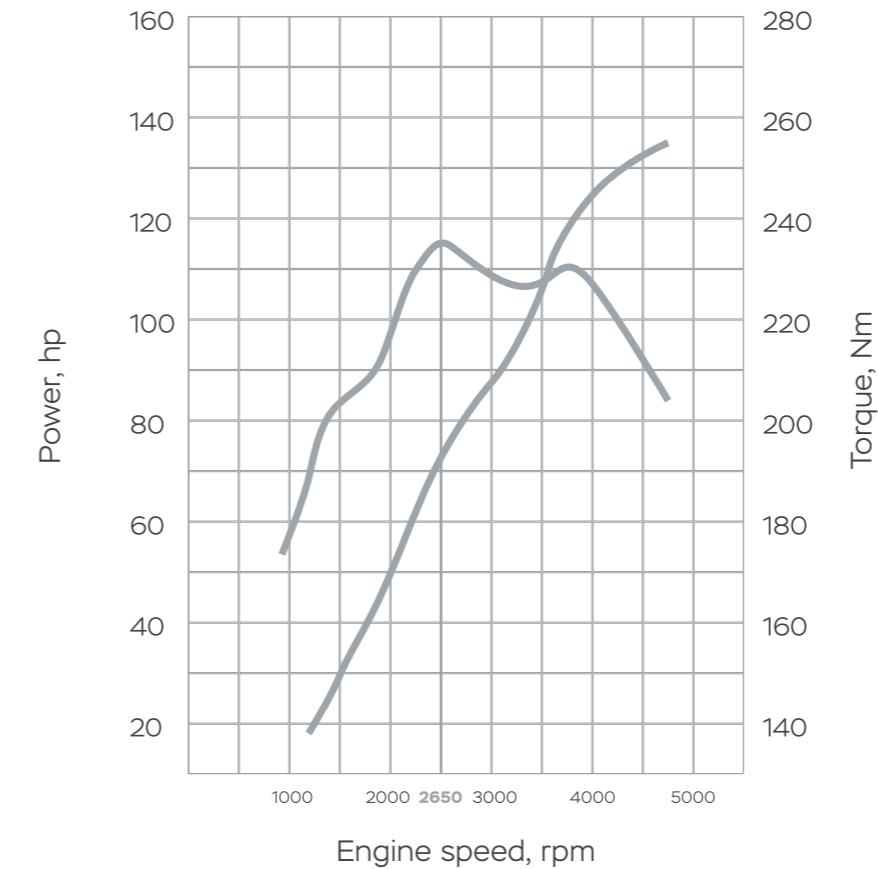

**ZMZ PRO**  
**149.6<sub>hp</sub>**  
**ENGINE**

Power – thrust – fuel consumption. The three vital engine parameters. What does it take to balance them out perfectly? The ZMZ Pro engine is designed to puzzle it out. Its nearly 150 horses will keep your vehicle up and running at full throttle. The ZMZ Pro produces 235.4 Nm of torque, with maximum thrust delivered at rpm as low as 2650.

Our most thrifty customers may take the advantage to opt for an LPG-compatible engine at once and order it ex-works. No extra registration required. Manufacturer's warranty remains valid.

Troubleshooting? No, thanks: we opt for trouble-free solutions. Such as a flexible-fuel engine, or globally rugged parts, from the cylinder head to the timing chain. Many make promises, but we are so confident of our quality that we offer a 4 year or 200,000 km warranty on the ZMZ Pro engine.

The updated engine delivers increased torque at low revs.

## Ultimate advantages and benefits all around: LPG kits ex-works

Certified, factory-installed LPG (propane-butane) kits

- Gas conversion kits
- Type of fuel used: petrol / LPG (Liquified Petroleum Gas)
- liquefied gas (propane-butane)
- Gas cylinder capacity 93/100/150 l
- Manufacturer's warranty remains valid
- Quick payback for LPG kits
- Total cruising range exceeds 1000 km

**4 YEARS WARRANTY**  
 or  
**200,000 KM**

# Safety

You may surely feel safe and sound when driving your UAZ Profi. Rather than other designs, conventional cab is more than about keeping your head. Quite often it's about saving your life. We have considered all possible risks and did our utmost to secure your safety all around, from daytime running lights to wide heated mirrors. An alarm system including immobilizer to safeguard your vehicle and freight.

When the going gets tough, the vital ABS and EBD systems may be a heaven-sent rescue. And the last line of defense is the three-zone collapsible steering column and airbag.

The conventional cab has proven to be the safest in head-on collisions

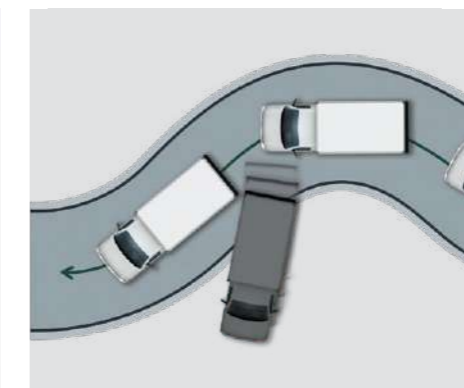

EBD – Electronic Brake Distribution

Driver airbag

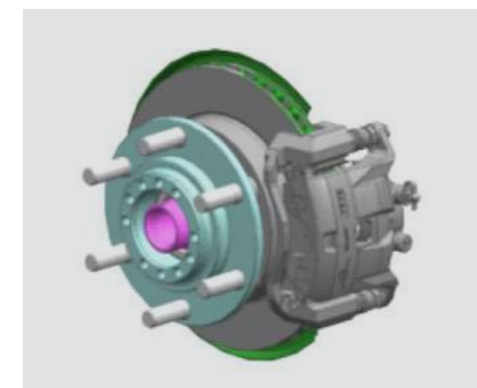

Height-adjustable seat belts

ABS – Anti-lock braking system

Terminal of ERA-GLONASS emergency system

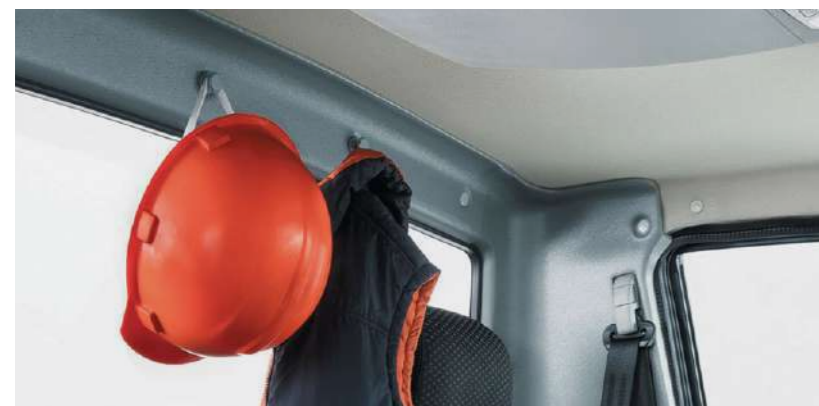

Front and rear vented disk brakes (for 4x2 versions)

# Features

## Storage compartments

Overhead console (single cab)

Clothes hooks (single cab)

Two glove boxes

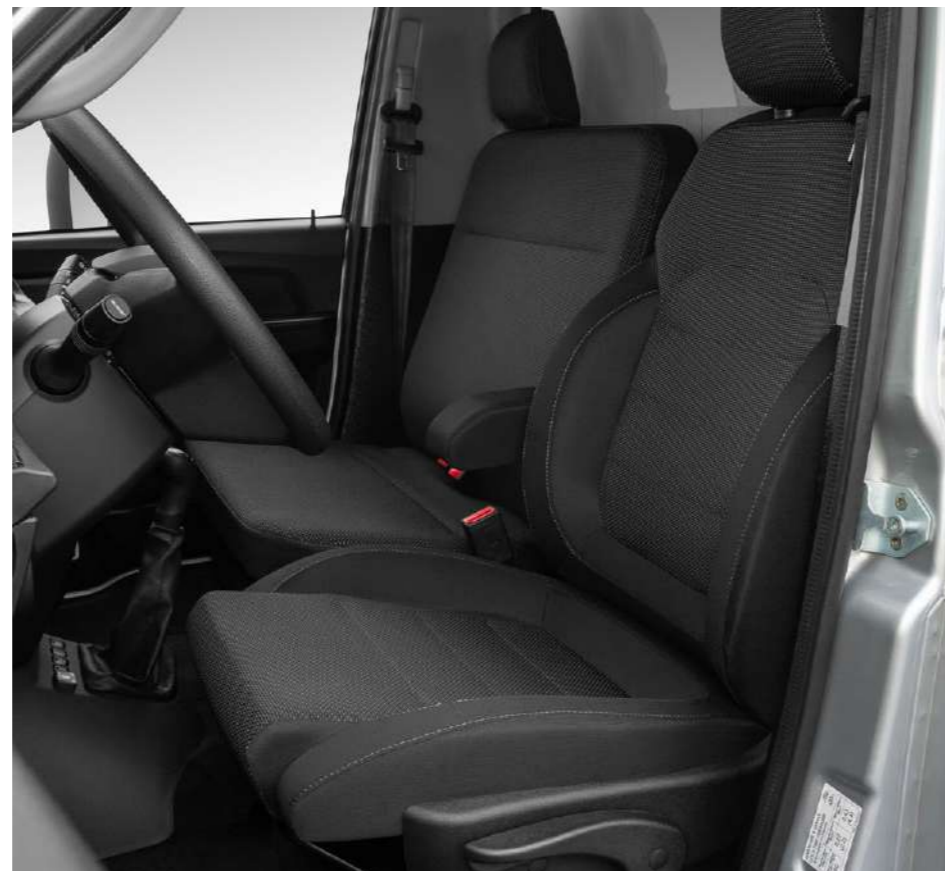

Map pockets in the doors, upper and lower glove boxes, spacious storage box within armrest console (for the 4x4 version)

# Usability and comfort

The steering wheel can be adjusted for height and for depth

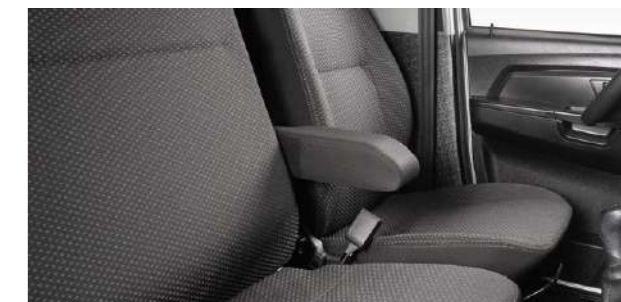

New comfortable bucket seat with advanced lateral support, extended cushion, heating, height adjustment and lumbar support (in the Comfort package)

Handrails on pillars

Cruise control

Armrest (for 3-seater)

Trendy steering column stalk switches and light control unit

On-board computer operated via the left steering column switch

Right steering column switch with adjustable windscreen wiper delay

Power windows and wing mirrors controls on the driver's door

A 12V socket, a niche for sundries and easy-to-reach climate control module

Tool organizer (for 3-seater)

# Climate control system

Winterization

Heated rear-view mirrors.  
Heated windshield, heated seats are available in the Comfort package.

Hot weather? Climate control, no sweat

The air conditioner comes complete with a chilled glove box in the Comfort package.  
The basic trim comes with A/C cab filter.

# Steering response

## Front suspension

The upgraded front suspension of the 4x2 version with four trailing arms and a straight, stiffer Panhard rod allows keeping the caster angle while driving. Steering system with separately fixed high-rigidity direct linkages and a damper enhance steering response and cornering ability of the LCV. Taken together, these innovations add to steering response and driving characteristics of the UAZ Profi, which takes the driving experience to the level of a passenger car.

The 4x4 Profi version comes with dependent spiral-spring suspension and anti-roll bar ensures smooth running regardless of road surface. The high energy absorption capacity of the suspension ensures smooth running even on rough surfaces, while offering the same reliability as leaf-spring suspensions. The UAZ Profi design employs the steering knuckles to enhance maneuverability and reduce the turning circle. Besides, the suspension design is designed so as to prevent so-called 'nosediving', which makes even sudden braking comfortable.

## Customizing for freighting

Thanks to its robust frame structure, the UAZ Profi shows great class when performing the most arduous tasks on notorious Russian roads and provides for the most diverse extra equipment to be installed. The model is equipped with six-lug hubcaps and special heavy-duty tires for commercial vehicles. Each tire withstands the most intense loads thanks to its wide-base profile and reinforced with extra plies as required for trucks. The new 1.5-ton Profi version has a frame of two rigidly welded 140-mm high 3.5-mm thick U-shaped sections.

Extra cross members and reinforcements were installed to further protect the critical areas. In addition, changes were made to the suspension attachment elements, including the stabilizer with links and shock absorbers. Thanks to increased camber and 50 mm wider track, new leaf springs in the 4x2 version level out UAZ Profi position when it's fully loaded. Together with dual wheels and 195/75R16 tires on the rear axle, they ensure a load capacity margin, enhance road-holding, reduce lurching when cornering and reduce axle load.

# Cargo bed equipment

Translucent roof Robust weatherproof curtain box

Durable plywood flooring, with flush lashing points to secure freight

Footrest and secure tailgate fixation

Rear lights indicating the vehicle dimensions with its tailgate open

Lockable box under the cargo bed

Best warranty and  
cost of ownership

Time is money. Save on both. UAZ offers an unrivalled warranty for the new truck: 4 years or 150,000 km of mileage. Unbeatable offer that no-one can outbid. A Profi ownership is even more attractive with affordable parts, budget-friendly maintenance and customer-centered service.

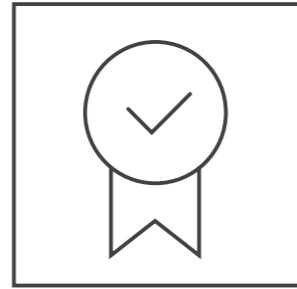

# Budget-friendly maintenance and service plans

## After-sales service contract

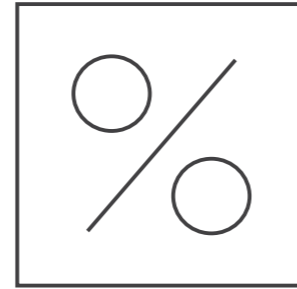

This is a real bargain as it covers a package of services for the maintenance of your UAZ vehicle fleet, sold at a fixed price, which is always less than the cost of separate maintenance checks.

Predictable and transparent cost of ownership

Quality of an authorized dealer's services

Save up to 15% on our service plans

## Terms and conditions of the after-sales service contract

01

Our customers are encouraged to purchase one of 4 programs at their discretion, valid for 1 to 4 years. Beside routine maintenance as advised by the manufacturer, the customers may wish to add optional service package including replacement of parts prone to wear and tear.

02

The UAZ PROFi service contract can be purchased either when signing a contract for a new vehicle supply or prior to the first maintenance check.

# Extra benefits

## “Top Priority”

Urgent and priority maintenance services in the event of a breakdown. High quality at a competitive price.

## Cost planning

The fixed price of services facilitates cost-planning during corporate budgeting.

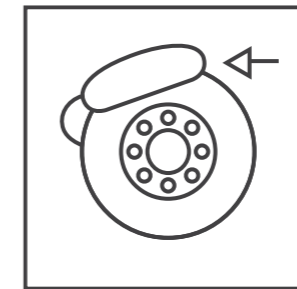

## Expertise in maintenance

Extends the service life of the vehicle fleet and keeps the manufacturer's warranty valid.

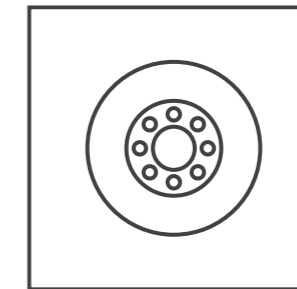

## Minimal downtime

Thanks to prompt maintenance.

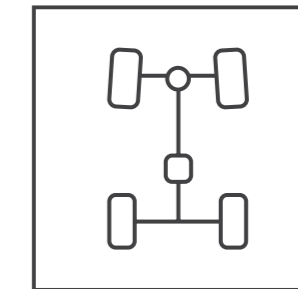

## Affordable spare parts: cheaper than outsourced equivalents
